

Nemo Healthcare is looking for a

(Junior) Product Development Engineer

Job description

Nemo Healthcare is a young and innovating medical device company that develops intuitive, wireless and non-invasive fetal monitoring solutions. Our aim is to make childbirth safer by providing high-quality and comfortable monitoring of the mother and baby. Our MDR-certified devices are being used by a growing number of customers all over Europe.

To further strengthen our growing company and the development of this technology, Nemo Healthcare is looking for a **(Junior) Product Development Engineer**. He/she will work in a cross-functional team in a highly collaborative and agile environment with, amongst others, experienced and passionate researchers, engineers, healthcare professionals and development partners.

As a (Junior) Product Development Engineer you will assist in the further development of the existing product by realizing new and improved functionality in subsequent hardware and software releases. In addition to this you will contribute to the development of new applications and products. Your activities include, but are not limited to, the development of prototypes and/or proof-of-concepts, the translation of user needs into technical solutions and the verification and validation of our solutions. You will work closely with our development partners and contribute to our risk management, quality assurance and regulatory compliance activities. You will also contribute to develop new monitoring strategies in cooperative research, e.g. the international artificial womb project.

The position is based in Veldhoven, The Netherlands.

Requirements:

- You have a bachelor degree or higher in electrical engineering, physics, computer science or equivalent
- You have demonstrable affinity with signal processing
- You have knowledge and experience with (embedded) software development
- You have (preferably) knowledge and experience with product development, including hardware development
- You have (preferably) knowledge about medical device regulatory affairs
- You are a critical thinker with problem-solving skills
- You have good interpersonal and communication skills
- You are a team player
- You are practical, operational and you like to 'get things done'
- You are flexible and independent and you are able to handle (time) pressure

Acquisition in response to this vacancy is not appreciated

We offer:

- A challenging position in an environment that is constantly changing: technological developments are going extremely fast and our current solution is just the beginning.
- A challenging and dynamic working environment where your personal wishes are taken into account.
- A working environment in which you will be trusted, supported and empowered to make a great success of your assignment.
- An exciting, energetic and professional small company work environment. We have short communication lines and it is our second nature to help and support each other where and whenever needed.

In addition to this, Nemo Healthcare encourages its people to maintain a healthy work-life balance and provides a market-conform reward package.

About Nemo Healthcare

Nemo Healthcare is an innovative spin-off from the Eindhoven University of Technology and Máxima Medical Center. We develop advanced medical applications for fetal monitoring in the field of Obstetrics/Gynecology. A strong scientific approach and clinical experiences form the foundation for all our activities.

Nemo Healthcare is a scale-up that is rapidly developing into a mid-size company with a strong international market proposition and widespread research activities. Nemo Healthcare has currently 15 employees and two Netherlands based key development partners.

Nemo Healthcare has the typical characteristics of a small company. This means fast decision-making, short lines of communication and a flat organization that functions as one team. At the same time, Nemo Healthcare has developed a structured and professional approach that fits a fast-growing company.

Within Nemo Healthcare we have a culture that is characterized by collegiality and respect for each other. Everybody within Nemo Healthcare is recognized for being an expert in his/her field.

Application procedure
